

Unstoppable like a freight train full of heavy metal and dark as black matter, it thunders and rumbles like a stampede when the four dudes reach out to their instruments.

MAGIC HUM is a hard rock/stoner rock band from Kiel, Germany. The band was founded in 2016 and went through some turbulent times until they found their final line-up.

Their first demo was released in autumn 2016 and the band is planning to release an album. The demo is available on SoundCloud and Bandcamp, together with a bootleg of a previously recorded live act.

The band had the chance to participate in numerous well attended shows with international line-up and is eager attend more stages.

Authentic, real, with songs about love and hate, the struggle to succeed in live and very personal lyrics, this could probably best describe what The Magic Hum is all about.

Their sound is a mixture of classic blues-rock tunes, combined with hard rock elements which creates a magical potion topped by the tremendous rough voice of the Chief and sends all those who give it a try it on a journey behind the mirror. Fuzzy parts are mixed with progressive solo parts which creates a very intense atmosphere on stage and front stage and they don't need more than their fuzz to rock every stage from Novosibirsk to Kapstadt.

The band had the chance to participate in numerous well attended shows with international line-up and is eager to gain more and more stage time to finally find a label to support them.

Authentic, real, with songs about love and hate, the struggle to succeed in live and very personal lyrics, this could probably best describe what The Magic Hum is all about.

If you don't know them yet, you will love them after their show.
